

Hatcher WTP Upgrade

Project Progress

November 22, 2010

Breaking ground in mid-June, general contractor Weaver Construction is making significant progress towards this \$6 million project scheduled for completion next spring. The precast panels and double T structuring are in place and crews are hard at work to get the majority of the outside work finished before winter sets in. Crews will work through the winter on the interior to get ready for the grand opening in June 2011.
